

FemiLift

Give Your Feminine Life a Lift

THE LEADING SOLUTION
FOR OPTIMAL FEMININE
WELLNESS AT ANY AGE

GIVE YOUR FEMININE LIFE A LIFT

The natural processes of your lifecycle as a woman, such as childbirth and hormonal changes, can lead to various conditions such as involuntary urine leakage, vaginal laxity, dryness and recurring infections. As a result, you may experience a decrease in the quality of your life and sense of self. FemiLift is a state-of-the-art, minimally invasive outpatient treatment that provides optimal results for various feminine conditions – regardless of your age or stage in life. It is quick, painless and completely safe, and provides highly effective results.

We believe in wellbeing of body and soul: a positive celebration of feminine life.

STATE-OF-THE-ART TECHNOLOGY

Restoring Strength & Elasticity

Like skin, vaginal tissue is made up of collagen fibers which give it strength and flexibility. FemiLift uses breakthrough CO2 laser technology to gently heat vaginal tissue, contracting existing fibers and stimulating the formation of new collagen.

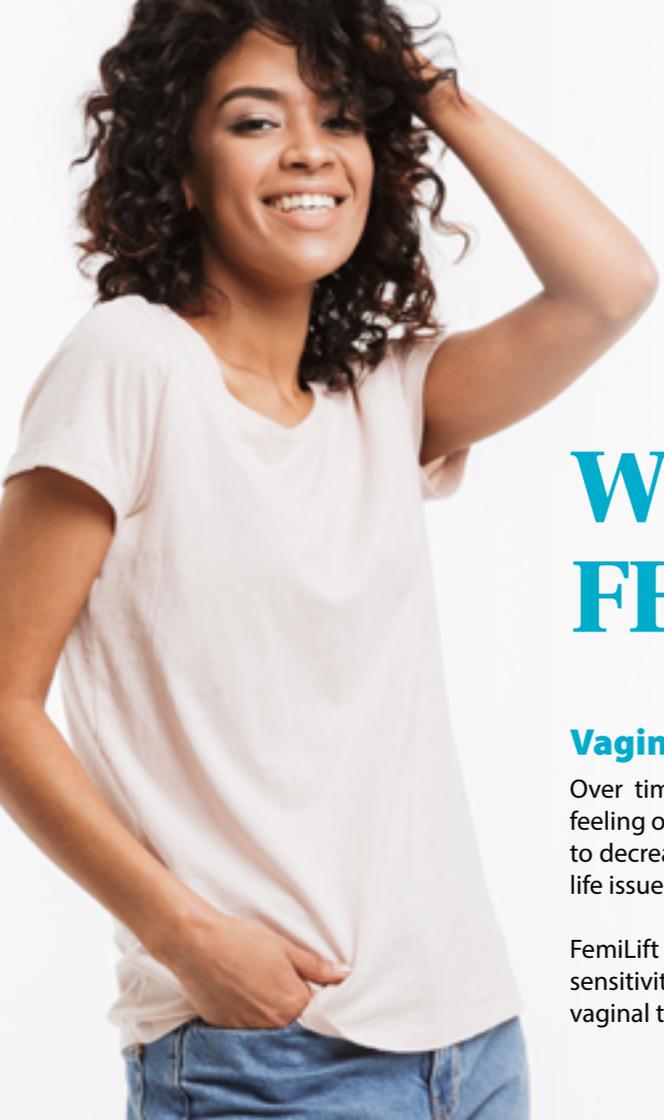

This improves the functionality of the entire vaginal area- normalizing blood flow, increasing lubrication, boosting immune resistance and restoring the strength and elasticity of the vaginal walls.

QUICK AND PAINLESS

Keep on going

One of the major benefits of the FemiLift treatment is the fact that it is conducted in a very short time and does not affect your routine. Similar to any vaginal ultrasound exam, a trained practitioner inserts a uniquely-designed, hygienic, single-use probe into the vagina, gently treating the vaginal tissue.

The entire treatment takes less than 30 minutes, is virtually painless and has no side effects. You can get right back to your day immediately after the treatment!

WHAT DOES FEMILIFT TREAT?

Vaginal Tightening

Over time, especially after childbirth, vaginal tissue can overstretch, creating a feeling of looseness (laxity) and reduced sensitivity in the vaginal area. This can lead to decreased satisfaction during sexual intercourse, creating a significant quality of life issue.

FemiLift tones and rebuilds the collagen of the vaginal walls, enhances the sensitivity of the vaginal receptors and contracts existing vaginal tissue, increasing vaginal tightness and improving sexual satisfaction.

Stress Urinary Incontinence (SUI)

SUI is a term that describes involuntary leakage of urine during activities that increase pressure in the abdomen such as coughing, sneezing, laughing or exercise. This condition is caused by a loss of strength in the urethra due to a weakened pelvic support structure. FemiLift treats the entire area, supporting the urethra, increasing the thickness of the vaginal walls and strengthening the pelvic support structure. The treatment reduces the symptoms of SUI and effectively restores urinary continence.

Post - Menopause

The shift in hormones that occurs with menopause can cause the lining of the vagina to become thinner, drier, less elastic and inflamed. FemiLift rejuvenates the vaginal lining, increasing the thickness of the vaginal walls and restoring lubrication. The treatment reduces uncomfortable symptoms such as itching, burning and increases friction and helps improve sexual function.

Post-Delivery Rehabilitation

Childbirth, a momentous lifecycle event, involves many physiological changes to a woman's body. Post-delivery, the vaginal area may feel stretched and dry and the pelvic floor may be weakened. FemiLift rehabilitates the entire vaginal area by strengthening and toning vaginal tissue, and restoring its strength and flexibility.

Vaginal Dryness & Recurring Infections

FemiLift helps women suffering from dryness and recurring vaginal infections by rejuvenating their vaginal lining and restoring lubrication. The treatment increases the vaginal immune system responses and blood flow, generates new healthy tissue with higher immune resistance to infections and allows the vagina to naturally maintain normal PH levels.

Enjoy being you again!

IMMEDIATE RESULTS

FAST, SAFE & EFFECTIVE

NO PAIN OR DOWNTIME

Is FemiLift Right for Me? It is, if you...

- ⇒ Suffer from vaginal laxity, vaginal dryness or recurring infections and involuntary urine leakage.
- ⇒ Are looking for a non-surgical solution for your female health concerns.
- ⇒ Want results, without experiencing pain or taking off time.
- ⇒ Are interested in a single solution that can effectively solve a variety of problems.
- ⇒ Seek a solution that is easily integrated into your general feminine healthcare and lifestyle management.
