

Alma Duo™

Always a Pleasure

Bring
spontaneity
back into
your life

Alma™
For You. For Life.

Why is it not **as great as it used to be?**

You may or may not know this, but the most important physical element that comes into play when you're about to have sex is blood flow. The more blood that flows to your sexual organs, the more powerful and satisfying the experience will be. So, whether it's circumstance or age that's keeping you from having the great sex you wish for yourself and your partner, the idea is to get more blood to the area – and that's what we know how to do.

How can

Alma Duo™ help?

Alma Duo is an advanced, effective solution registered and listed with the FDA as a Class I and CE Class IIb medical device. It uses the gold standard in shock wave technology - focused low-intensity extracorporeal shock wave therapy (LI-ESWT) – to stimulate blood flow to the sexual organs, restoring natural function and helping with the effects of aging on vascular function.

A series of six 15-minute treatments is carried out by a trained practitioner, over the course of three weeks. Clinically-validated long-term results show that for men, the treatment strengthens their erection, and can be effective for 1-2 years. For women it enhances the orgasm.

3 / **6** / **15**
weeks / treatments / minutes each

NO pills | NO needles | NO surgery | NO pain

NO topical anesthetic | NO recovery time

52%
of all men over 40
will experience
erectile dysfunction
(ED).

Let's talk about **Erectile Dysfunction – ED.**

Also known as impotence, ED isn't always total. Sometimes things just slow down - it takes you longer to get into action, or you can't last as long. Either way, it's frustrating, perhaps even stressful - for you and your partner - and could certainly knock a guy's confidence.

Why men experience performance issues

The body's vascular structures - the vessels that carry blood through the body - deteriorate with age... it's inevitable. It's therefore no surprise that most cases of ED are vascular-related, caused by a lack of blood flow to the penis, or blood draining too quickly.

Taking steps to maximize your orgasm is something you can do for yourself. Even if you have a wonderful lover (especially if you have a wonderful lover) and you reach orgasm every time – you can make it stronger, more powerful, and more explosive.

Why does your Big O have less Ohhhh

The body's vascular structures - the vessels that carry blood through the body - deteriorate with age... it's inevitable. Insufficient blood flow to the vaginal area due to poor circulation can mean it may take longer to reach orgasm, it may be less explosive, or it may not happen at all. If this goes on over time, it can be distressing and may even lead to conflict in your relationship. But, you're not alone - this is the second most common sexual complaint by women around the world.

60%
of women are
dissatisfied with
their sex life.

About the treatment

Treatment is carried out in six, 15-minute sessions, over the course of three weeks. It is focused on certain key areas, as shown below.

Men

Treatment is applied to:

- three points perpendicular to the penile shaft
- two at the base of the penis

Women

Treatment is applied to:

- left labia majora
- right labia majora
- above-center

There is a quick and simple His & Hers solution that can make good >> great. And great >> even greater!

FDA registered & CE approved

Listen to the experts

"Since I began treating women with Alma Duo to help improve their enjoyment of sex, I've seen amazing results. There's never been such a safe and effective way to enhance a woman's sexual pleasure - I wish more women knew about it. Because, in today's world, you can have it all - and that includes in the bedroom!"

Dr. Carolyne Delucia | Gynecologist, USA

"Alma Duo is a truly remarkable solution, offering significant relief from ED. I can now offer my patients a real solution that is painless, clinically proven and safe, AND has long-lasting results. There's really no reason for people to feel uncomfortable asking for help with improving their sexual performance. We, as medical professionals, need to be talking about treatments like this that are simple, safe and effective."

Dr. Arik Shechter | Expert in Sexual Medicine, Israel
